

# Technical Information for Pole Buildings—Lincoln County Building Division

The following is a typical cross-section for a residential/agricultural 'pole building'. It may or may not represent the proposed project. If you are using this detail as a portion of your plan submittal, please complete the requested information where indicated. This completed detail, along with any additional information, needs to be submitted with your application and be on site at the time of inspection. The maximum width of a pole building (truss span) is 36 feet. The maximum area of buildings constructed under the provisions of this brochure is limited to 3,000 square foot maximum.

**REQUIRED INSPECTIONS:**

1. Hole inspection required before holes are filled to determine diameter, depth of holes and setbacks of the structure relative to property lines.
2. Framing and Final inspection required after entire structure is framed and siding/roofing materials applied and **PRIOR** to use or occupancy of the building.
